What's new in the CGA

Pontignano/Siena , July 2001

The SCAR Composite Gazetteer of Antarctica, CGA, was edited in March 1998 and copies of it were made available to the national delegations during the SCAR meeting held in Concepción.

A new publication, the Supplement to the First Edition, aimed at the updating of the CGA, was prepared for the discussion to be held at the Tokyo's SCAR meeting and was edited in August 2000.

Following the publication of the Supplement new data or amendments to the existing data have been collected, as usual, from the SCAR countries and added to the database.

In the meantime the CGA web site, www.pnra.it/SCAR_GAZE, was maintained and is being quarterly updated.

Scope of the present document is to list all additions/amendments intervened **after August 2000** and therefore not contained in the Supplement.

The following contributions have been received and processed in the time span August 2000 to July 2001:

| | |
|------------------------------|--|
| 18 Dec. 2000 | Letter from Olav Loken (Canada) |
| 26 Jan. 2001 | Downloading of one new name from the German web site |
| 5 Feb. 2001 and 21 Mar. 2001 | E-mail messages from Janet Thomson (UK) |
| 5 Feb. 2001 | E-mail attached file from Louis Yost (USA) |
| 1 Mar. 2001 | E-mail attached file from Michel Huet (IHO-GEBCO) |
| 7 May. 2001 | E-mail attached file from Wendy Shaw (NZ) |

Altogether the contributions consist in the following.

- **155 new features:** 145 introduced by USA, 5 by the General Bathymetric Chart of the Oceans (GEBCO), 2 by UK, 1 by Canada, 1 by Germany, 1 by New Zealand;
- **230 new-adopted names:** 138 adopted by USA and already named by NZ, 88 adopted by NZ and already named by USA, 4 adopted by GEBCO and already named by USA;
- **2 changes in the feature reference number,** 1 affecting NZ and 1 affecting ARG;
- **2 name changes:** 1 received from NZ and 1 from GEBCO;
- **5 corrections of co-ordinates:** 2 received by UK, 2 by NZ and 1 by USA.

The following table lists, in alphabetical order, all the names affected by a revision, the last column adding some detail on the kind of changes.
