

SCAR WG-GGI project: Standards
Status report - XXVI SCAR, Tokyo, July 2000

A. Map and data

A full list of features to be shown on large- and small-scale topographic maps of Antarctica, and in databases, has been prepared, a feature code system developed and a data dictionary for all features has been compiled. A summary of the coding system released in draft form on the WG-GGI web site in June 2000 is shown below. Designs for the symbology and the full cartographic specifications for the reproduction of the symbology are under development at present. Although a digital library of symbology has not been incorporated into the draft version, a sample of what is possible can be seen on: http://www-antdiv.gov.au/mapping.symbols.Standard_Symbols.pdf.

Notes on the draft coding system

A list of the features that are likely to be found on maps of Antarctica at scales of 1:2000 to 1:20,000,000 is shown below. A system of feature codes is also proposed. It is hoped that sufficient flexibility has been built into the feature code system to allow for additional features, and sub-sets of features, to be included at a later date, should the need arise.

Features. The list of features has been developed from the SCAR *Standard symbols for use on maps of Antarctica*, to meet the needs of large-scale map production and the creation of databases. The features listed have been divided into distinct categories: oceanic, coastal and terrestrial, human-related, fauna and flora, and projection details. Related features, for example coastal ones such as ice-free coastline and ice-covered coastline, are grouped together in the table for ease of reference, and they have consecutive feature code numbers. Definitions of the terms used are included in the table.

Feature codes. A six-digit code provides the following information about a feature:

- a) the first number indicates the feature category: 1, oceanic; 2, coastal; 3, terrestrial; 4, human-related; 5, fauna (birds); 6, fauna (animals); 7, flora; and 8, projection details,
- b) 2nd to 3rd digit (1–99), feature*,
- c) 4th digit (0–9), subset of feature,
- d) 5th digit, class of feature: 0, class not known; 1, point or mark; 2, line; 3, polygon; 4, annotation,
- e) 6th digit, whether text is associated with the feature: 0, without text; 1, with text.

Specification. The complete list provides a look-up table for replication of the required symbology. Standards for line weight, colour, screens and patterns for area fill, size and shape of graphical symbols, style of annotation, etc. are based on a number of different sources, including the original 1980 SCAR document. This column of the table is incomplete at present but several of the proposed symbols are available in digital form at http://www-aadc.antdiv.gov.au/mapping.symbols.Standard_Symbols.pdf.

Acknowledgements: These draft documents have built on the solid work undertaken by Norsk Polarinstitutt in preparing the “Map specification standards recommended for use on topographic maps of Antarctica”, tabled at XXIV SCAR in 1996. Cheryl Hallam and Jerry Mullins, US Geological Survey, and Paul Cooper, British Antarctic Survey, have contributed greatly to the development of the feature code system proposed herein.

* Note that the term “undifferentiated” means that the subset of the feature is not known.

<u>Oceanic features</u>	<u>100-113</u>		
Permanent	100-105		
Sea	100		
Bathymetric contours	101		
Isolated bathymetric depression	102		
Sounding	103		
Offshore rocks	104		
Continental shelf	105		
Transient	110-113		
Antarctic Convergence	110		
Sea-ice extension	111		
Fast or bay ice	112		
Stranded iceberg	113		
<u>Coastal features</u>	<u>200-210</u>		
Coastline, undifferentiated	200		
Ice-free coastline, undifferentiated	201		
Ice-free coastline against open sea	202		
Ice-free coastline against ice shelf	203		
Ice-covered coastline, undifferentiated	204		
Ice-covered coastline (ice wall) against open sea	205		
Ice-covered coastline against ice shelf (grounding line)	206		
Ice shelf features	207		
Ice front	208		
Ice tongues	209		
Tidal zones	210		
<u>Terrestrial features</u>	<u>300-346</u>		
Inland, ice-covered	300-304		
Ice-covered area, undifferentiated	300		
Disturbed ice features	301		
Elevated features	302		
Depression area	303		
Blue ice	304		
Inland, ice-free	310-311		
Ice-free areas	310		
Ice-free elevated features	311		
Inland, drainage	320-324		
Glacier	320		
Stream/river	321		
Alluvial fan	322		
Swamp/marsh/flooded area	323		
Lake	324		
Inland, elevation	330-337		
Contours, undifferentiated	330		
Contours, ice-covered ground	331		
Depression contour on ice-covered ground	332		
Elevation point on ice-covered ground	333		
Ice thickness	334		
Contours on ice-free ground	335		
Depression contour on ice-free ground	336		
Elevation point on ice-free ground	337		
Survey	340-346		
Control point, undifferentiated	340		
Astronomical control point	341		
Gravimetric control point	342		
Geodetic control point	343		
Geodetic satellite control point	344		
Bench mark	345		
Tide gauge	346		
<u>Human-related features</u>	<u>400-453</u>		
Tracks	400-403		
Tracks, undifferentiated	400		
		Oversnow route	401
		Permanent tractor track	402
		Road	403
		Aircraft	410-416
		Aerodrome, undifferentiated	410
		Aerodrome, wheeled aircraft	411
		Aerodrome, ski-equipped aircraft only	412
		Aerodrome, helicopter	413
		Water aerodrome	414
		Landing strip	415
		Aircraft wreckage	416
		Ships and boats	420-422
		Anchorage/landing place for vessels, undifferentiated	420
		Shipwreck	421
		Beacon	422
		Constructions	430-440
		Buildings	430
		Scientific station	431
		Refuge	432
		Storage facilities	433
		Radio mast	434
		Pipe line	435
		Power line	436
		Automatic weather station	437
		Signpost	438
		Disturbed ground	439
		Burial site	440
		Environmental	450-454
		Historic site or monument	450
		Antarctic Specially Protected Area	451
		Antarctic Specially Managed Area	452
		Site of Special Scientific Interest	453
		Environmental zone	454
		<u>Fauna: birds</u>	<u>500-508</u>
		Bird colony, undifferentiated	500
		Albatross	501
		Cormorant	502
		Petrel	503
		Penguin rookery, undifferentiated	504
		Adélie rookery	505
		Chinstrap rookery	506
		Emperor rookery	507
		Gentoo rookery	508
		<u>Fauna: animals</u>	<u>600-601</u>
		Animal colony, undifferentiated	600
		Seal colony	601
		<u>Flora</u>	<u>700-704</u>
		Vegetation, undifferentiated	700
		Moss bank	701
		Lichen colony	702
		Grass patch	703
		Algae	704
		<u>Projection-related features</u>	<u>800-806</u>
		Isogones	800
		Magnetic declination	801
		Magnetic pole	802
		Geographical pole	803
		Antarctic circle	804
